RESEARCH & TECHNICAL INTERESTS

Computer vision, Generative AI (GenAI), Machine learning, Human action understanding in videos (time series prediction), Scene-text understanding, Object detection, Representation learning, Multimodal learning, and Optimization algorithms.

EDUCATION

Stony Brook University, Stony Brook, NY — Aug 2015 – May 2023
Ph.D. in Computer Science
Advisor: Prof. Minh Hoai Nguyen

University of Science, Ho Chi Minh City, Vietnam — Sep 2009 – Dec 2011
M.S. in Information Systems - (Top 1%)

University of Science, Ho Chi Minh City, Vietnam — Sep 2005 – May 2009
B.S. in Information Technology (Computer Science) - (Top 5%)

INDUSTRY & RESEARCH EXPERIENCE

Senior Applied Scientist, SpreeAI Corporation (Remote, NY), Manager: Minh Vo — Jun 2023 – Jun 2026

- Developing systems for exemplar-guided and multi-pose virtual try-on, with a focus on realistic garment deformation and identity preservation.
- Built and trained end-to-end virtual try-on pipelines, including garment alignment and geometric warping modules for high-fidelity image synthesis.
- Partnered with cross-functional product and engineering teams to transition research prototypes into scalable production.

Research Assistant, Stony Brook University — Aug 2016 – May 2023

- Designed vision-language models (VLMs) for text–video retrieval by aligning caption-level linguistic similarity with video-level visual similarity for improved bidirectional retrieval.
- Applied language models (BERT) as semantic and contextual knowledge sources, distilling their knowledge into video-based models for future action prediction.
- Built multi-stage knowledge-distillation pipelines for human action anticipation, including supervision from action-recognition models on unannotated video segments.

Visiting Research Scientist, VinAI Research — Jul 2019 – Aug 2019

- Improved scene text recognition by incorporating lexicon-based constraints during both training and inference.

Research Intern, National Institute of Informatics, Tokyo, Japan — Jan 2013 – Mar 2013

- Developed a video retrieval system leveraging semantic concepts, color layout, and faces for large-scale video exploration.

PUBLICATIONS & SERVICE

- **Publications**: Google Scholar.
- **Reviewer**: BMVC 2020, ICCV 2021, BMVC 2021, CVPR 2022, ECCV 2022, ACCV 2022, CVPR 2023, ICCV 2023, BMVC 2023, CVPR 2025, CVPR 2026, ACMM 2026

HONORS & AWARDS

- **Special CS Department Chair Fellowship**: ($4,000), Stony Brook University, 2015
- **Video Browser Showdown Winner**: The International Conference on Multimedia Modeling (MMM), 2013

TECHNICAL SKILLS

- **Languages:** Python, C++, Java, C#, MATLAB
- **Deep Learning:** PyTorch(8+ years), TensorFlow(8+ years), Hugging Face(3+ years), Scikit-learn(8+ years)
- **Databases:** MySQL(8+ years), MS SQL Server(8+ years)
- **Others:** Fast-paced environment, strong communication skills and the ability to synthesize complex information.
